Warning: Our kennels are for temporary residential use for domestic, tame animals ("pets") only, and are not for commercial use. Always ensure your pets have plenty of shade, water and a cool place to rest when outside. This product should not be used to contain animals or breeds that are aggressive in nature, animals that may have aggressive tendencies or have demonstrated aggressive behavior, animals that respond adversely to confinement, or animals that are prone to escaping confinement. Additional measures must be taken to ensure the safety of your animal and others if your animal is able to escape light duty confinement. Animals may be able to open the gate latch if additional measures are not taken to ensure the latch stays in place, such as the use of a locking device. We do not recommend using our kennels for multiple animals, especially those large in size or weight, or animals that have not been trained to accept confinement.
